

Next Edge AHL Fund

Next Edge Capital Corp., September 2016

The 'Next Edge AHL Fund' or 'Fund' means the 'Next Edge AHL Fund'.

Capitalized terms not defined in this presentation are defined as set forth in the prospectus of the Fund (the 'Prospectus').

This communication is not, and under no circumstances is to be construed as, an invitation to make an investment in the Fund nor does it constitute a public offering to sell the Fund or any other products described herein. Applications for the Fund will only be considered on the terms of the Prospectus. The Prospectus contains important detailed information about the Fund. Copies of the Prospectus may be obtained from Next Edge Capital Corp., the principal distributor of the Fund. Each purchaser of the units of the Fund (the 'Units') may have statutory or contractual rights of action under certain circumstances as disclosed in the Prospectus. Please review the provisions of the applicable securities legislation for particulars of these rights. Terms defined herein shall have the same meaning as in the Prospectus. Potential investors should note that alternative investments can involve significant risks and the value of an investment may go down as well as up.

There is no guarantee of trading performance and past or projected performance is not indicative of future results.

Next Edge Capital Corp. is the manager and trustee of the Fund (the 'Manager'). The Fund obtains economic exposure to an investment portfolio (the 'Underlying Assets') managed by an unaffiliated investment manager, AHL Partners LLP (the 'Investment Manager') that ultimately invests in a diversified portfolio of financial instruments across a range of global markets including stocks, bonds, currencies, short-term interest rates, energies, metals, credit and agricultural commodities using a trend-following trading program (the 'AHL Diversified Programme'). The AHL Diversified Programme is implemented and managed by AHL ('AHL'), a division of the Investment Manager. The Investment Manager is a part of the Man Investments division ('Man') of Man Group plc ('Man Group').

Investors should review the Prospectus in its entirety for a complete description of the Fund, its risks, and consult their registered dealers before making an investment.

The information contained in this material is subject to change without notice and Next Edge Capital Corp. will not be held liable for any inaccuracies or misprints.

Any descriptions or information involving investment process or strategies is provided for illustration purposes only, may not be fully indicative of any present or future investments, may be changed at the discretion of the Investment Manager and are not intended to reflect performance.

The Fund has not been, and will not be, registered under the United States Securities Act of 1933, as amended, or any State securities laws. The Fund may not be offered or sold in the United States or to US persons.

Cautionary note regarding forward-looking statements

The following presentation may contain forward-looking statements. All statements, other than statements of historical fact, that address activities, events or developments that Next Edge Capital Corp., AHL Partners LLP or any affiliates thereof (the 'Companies') believe, expect or anticipate will or may occur in the future (including, without limitation, statements regarding any targeted returns, projections, forecasts, statements and future plans and objectives of the Companies) are forward-looking statements. These forward-looking statements reflect the current expectations, assumptions or beliefs of the Companies based on information currently available to the Companies.

Forward-looking statements are subject to a number of risks and uncertainties that may cause the actual results of the Companies to differ materially from those discussed in the forward-looking statements, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on, the Companies.

Factors that could cause actual results or events to differ materially from current expectations include, among other things, changes in international financial and commodities markets, fluctuations in currency exchange and interest rates, illiquidity of portfolio investments, reduction in availability of leverage, default by counterparties, special risks arising from short sales and investments in forward contracts and other derivatives, unintentional trades, accuracy of analytical models, valuation risks, limitations on redemptions, tax consequences, changes in applicable laws and other risks associated with investing in securities and those factors discussed under the section entitled 'Risk Factors' in the Prospectus.

Any forward-looking statement speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the Companies disclaim any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise. Although the Companies believe that the assumptions inherent in the forward-looking statements are reasonable, forward-looking statements are not guarantees of future performance and accordingly undue reliance should not be put on such statements due to the inherent uncertainty therein.

Certain Risks of Investing in Next Edge AHL Fund

There are risks associated with an investment in the Fund, as a result of, among other considerations, the nature and operations of the Fund. An investment in Units should only be made after consultation with independent qualified sources of investment and tax advice. An investment in the Fund is speculative and involves a high degree of risk and is not intended as a complete investment program. It should be borne in mind that risks involved in this type of investment are greater than those normally associated with other types of investments. There is a risk that an investment in the Fund will be lost entirely or in part. Only investors who do not require immediate liquidity of their investment and who can reasonably afford a substantial impairment or loss of their entire investment should consider the purchase of Units. An investment in the Fund is not suitable for investors seeking current income for financial or tax planning purposes as distributions, if any, will generally be automatically reinvested on behalf of Unitholders in additional Units of the same Class.

The following does not purport to be a complete summary of all the risks associated with an investment in the Fund.

No Guarantee There is no guarantee that an investment in Units will earn any positive return. The value of the Units may increase or decrease depending on market, economic, political, regulatory and other conditions affecting the Underlying Fund's portfolio. Investment in Units is more volatile and risky than some other forms of investments. All prospective Unitholders should consider an investment in the Fund within the overall context of their investment policies. There can be no assurance that the Underlying Assets will be able to achieve its investment objective. The investment strategies applied in the Underlying Assets may not have previously been used by a fund similar to the Underlying Fund. There is no assurance that the information set out herein will be, in any respect, indicative of performance. Legal, tax and regulatory changes may occur that can adversely affect the Fund and Unitholders.

No Advice to Investors The Manager, Investment Advisor, underlying investment managers and advisors, bank, legal counsel, accountants and other service providers who provide advice and other services to the Fund and the Underlying Assets are accountable to the Fund and the Underlying Assets only and not to the Unitholders themselves. Each prospective investor should consult his own legal, tax and financial advisers regarding the desirability of an investment in the Fund.

Potential Conflicts of Interest There are certain potential conflicts of interest including the fact that the Manager, the Investment Advisor and their affiliates may carry on investment activities for other clients (including investment funds sponsored by the Manager, the Investment Advisor or their affiliates) or on a proprietary basis in which the Fund or the Underlying Assets will have no interest. Future investment activities by the Manager or the Investment Advisor, including the establishment of other investment funds, may give rise to additional conflicts of interest. Similar conflicts of interest may arise in the case of any hedge fund held in the portfolios of the Underlying Assets. Investors should refer to the conflicts of interest section in the offering memorandum for further discussion.

Reliance on the Manager, Investment Advisor & Analytical Tools The Fund will be highly dependent upon the expertise and abilities of the Manager and the Investment Advisor. The loss of services of key personnel of any of the foregoing persons could adversely affect the Fund. Substantially all decisions with respect to the management of the Underlying Assets will be made exclusively by the Investment Advisor (although it may delegate administrative responsibilities from time to time). The Investment Advisor will make and implement decisions with respect to the allocation and investment of the Underlying Assets. The AHL Diversified Programme uses certain strategies that depend on the reliability and accuracy of analytical models. To the extent that such models (or the assumptions underlying them) do not prove to be correct, the Underlying Assets may not perform as anticipated, which could result in substantial losses for the Fund and therefore, for Unitholders.

Illiquidity Under certain conditions redemptions may be temporarily restricted or suspended. Unitholders requesting redemptions may therefore potentially experience delays in receiving redemption payments. An investment in Units is hence suitable only for sophisticated investors who do not need full liquidity with respect to this investment. The Underlying Assets may make leveraged investments in markets that are volatile and which may become illiquid. Accordingly, it may be impossible or expensive to liquidate the positions against which the market is moving. Alternatively, it may not be possible, in certain circumstances, for a position to be initiated or liquidated promptly. The ability of the Underlying Assets to respond to movements may be impaired. These risks may be accentuated where the Underlying Assets are required to liquidate positions to meet margin requests, margin calls, redemption requests or other funding requirements. Due to the differences in margin treatment between futures and options, there may be periods in which positions on both sides must be closed down prematurely due to short-term cash flow needs. Were this to occur during an adverse move in a spread or straddle relationship, a substantial loss could occur.

Fees and Expenses The Fund is obligated to pay Management Fees and other expenses regardless of whether the Fund realizes a profit. Under certain circumstances, the Fund may be subject to significant indemnification obligations in respect of the Manager, the Trustee or certain affiliated parties. The Underlying Assets will have to support significant transaction costs and fees, including management and performance fees paid in respect of the AHL Diversified Programme. The performance of the Underlying Assets will also be affected by brokerage and related transaction costs.

Insufficient Trading Capital The Investment Advisor manages risk to ensure that the Underlying Assets risk are within predetermined levels. Nevertheless, in the event of an exceptional decline in value of the underlying portfolio's trading capital to a level insufficient to sustain access to the AHL Diversified Programme, the Underlying Assets may have to cease trading activities in the AHL Diversified Programme.

No Recourse to the Underlying Assets The return to the Unitholders and the Fund will be dependent upon the return on the Underlying Assets. Securities in the Common Share Portfolio may be pledged to and may be held by the Counterparty as security for the obligations of the Fund. However, Unitholders will not have, and the Units will not represent, any direct or indirect ownership interest in assets in the Underlying Fund. Investors will have no recourse to assets in the Underlying Fund.

Use of Leverage & Derivatives There are a number of risks associated with the use of leverage and derivatives. Risks associated with options or instruments and with the instruments themselves may differ from the risks associated with underlying assets. Derivative instruments may not be liquid in all circumstances, so that in volatile markets the Underlying Assets may not be able to close out a position without incurring a loss. No assurance can be given that short sales, hedging, leverage and other techniques and strategies used by the Underlying Assets will not result in material losses. The uncovered selling of a call option generally exposes the seller to unlimited risk. The use of over-the-counter derivatives will subject the Underlying Assets to the credit risk that its counterparty may not be able to meet its financial obligations and thus, the Underlying Assets could possibly lose its margin and any gains on a contract. Investors should refer to the Prospectus for further discussion.

Investment in Emerging Markets The Underlying Fund's underlying investments may be established in jurisdictions where there is no regulatory supervision or where regulatory supervision is limited and the Underlying Assets may invest in emerging economies or markets, and in unrated, illiquid, volatile or low-grade assets. There will only be very limited constraints on the investment techniques that can be employed by the Underlying Fund. The value of the Underlying Fund's assets may be affected by uncertainties such as international political developments, changes in government policies, taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of the countries in which its assets are ultimately invested.

Currency Risk Exchange rate fluctuations could cause the value of the Underlying Assets to diminish or increase. Investments of the Underlying Assets that are denominated in a foreign currency are subject to the risk that the value of a particular currency will change in relation to one or more other currencies. The Underlying Assets may, but are not obligated to, hedge these risks by investing directly in foreign currencies, buying and selling forward foreign currency exchange contracts and buying and selling options on foreign currencies, but there can be no assurance such strategies will be effective.

These are only some of the risks of investing in Next Edge AHL Fund. Please review the "Risk Factors" section of the Prospectus for a more complete description of the risks.

- Formed in July 2006, was renamed Next Edge Capital Corp. ('Next Edge') after the spinout of Man Investments Canada Corp. from Man Group plc ("Man") in June 2014
- Next Edge continues to support a number of the Canadian retail products offered by Man
- Licensed as an Exempt Market Dealer, Portfolio Manager and Investment Fund Manager
- Management team responsible for raising over CDN \$3 Billion of alternative assets in Canada since 2000
- Focused on providing unique, non-correlated investment ideas

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS. 1. THIS IS INFORMATION ON THE UNDERLYING PROGRAMME AND NOT THE FUND. The historical annualized rates of return for AHL Diversified Programme, as of June 30th, 2016 are: 1-year 0.25%; 3-year 7.37%; 5-year 3.39%; 10-year 5.51% and 12.51% since inception on March 26, 1996. AHL Diversified Programme represented by the performance of Man AHL Diversified plc from March 26, 1996 to October 29, 2012, and by Man AHL Diversified (Guernsey) USD Shares – Class A from October 30, 2012 onwards (both hedged from USD to CAD using the relevant 3 month risk free rate differentials). The representative product was changed at end-October 2012 due to legal and/or regulatory restrictions on Man AHL Diversified plc preventing the product from accessing the Programme's revised target allocations. The Investment Manager manages the assets of the Underlying Assets in accordance with the AHL Diversified Programme. While it is intended that the Underlying Assets will be managed with the same investment objectives in managing the assets of AHL Diversified Programme, their investments may not be identical and the returns of the Underlying Assets will differ from the returns of AHL Diversified Programme. Differences in performance will be due to a number of factors including but not limited to fees, expenses, taxes, currency hedging, foreign exchange, variations in trading programmes and allocations, variations in notional exposure, investments not being identical, cash flows and asset size. The leverage, strategy and investments of AHL Diversified Programme have varied over time and as a result performance in any future period will vary. AHL Diversified Programme is valued weekly, however, for comparative purposes, statistics have been calculated using the last weekly valuation for each month.

Investor Requirements

Managed Futures

Performance

Has delivered positive returns over 40 years through economic cycles

Simplicity

Core strategy identifies and profits from price trends

Liquidity

Liquid portfolio holdings at all times

Portfolio Enhancement

Rare opportunities to profit during times of equity market turmoil

Strategy

- Trend following over 400 markets; 100% systematic
- Aims to profit from market rallies *and* sell-offs
- Trades 24 hours a day, with real time risk management

Target Investors

- Investors looking for
- diversifying alpha
 - liquid strategies

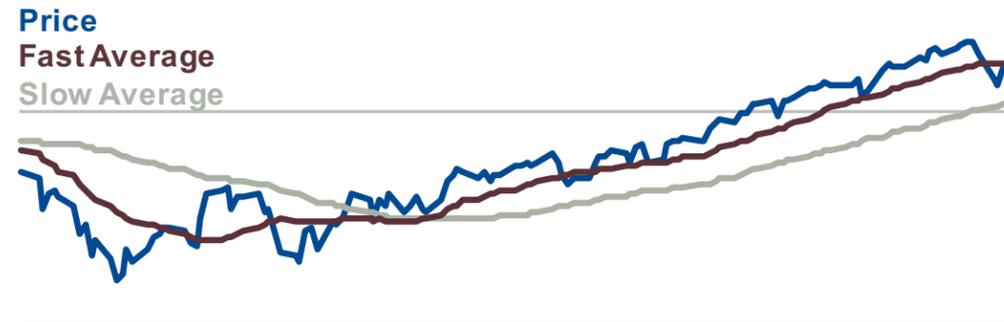

Portfolio Fit

- Momentum is a persistent effect in markets
- Strong equity diversifier
- Access to many unique markets through AHL Evolution

Model Features

Illustrative Momentum Calculation

b. Signal = fast - slow

c. Turning signal into position / risk

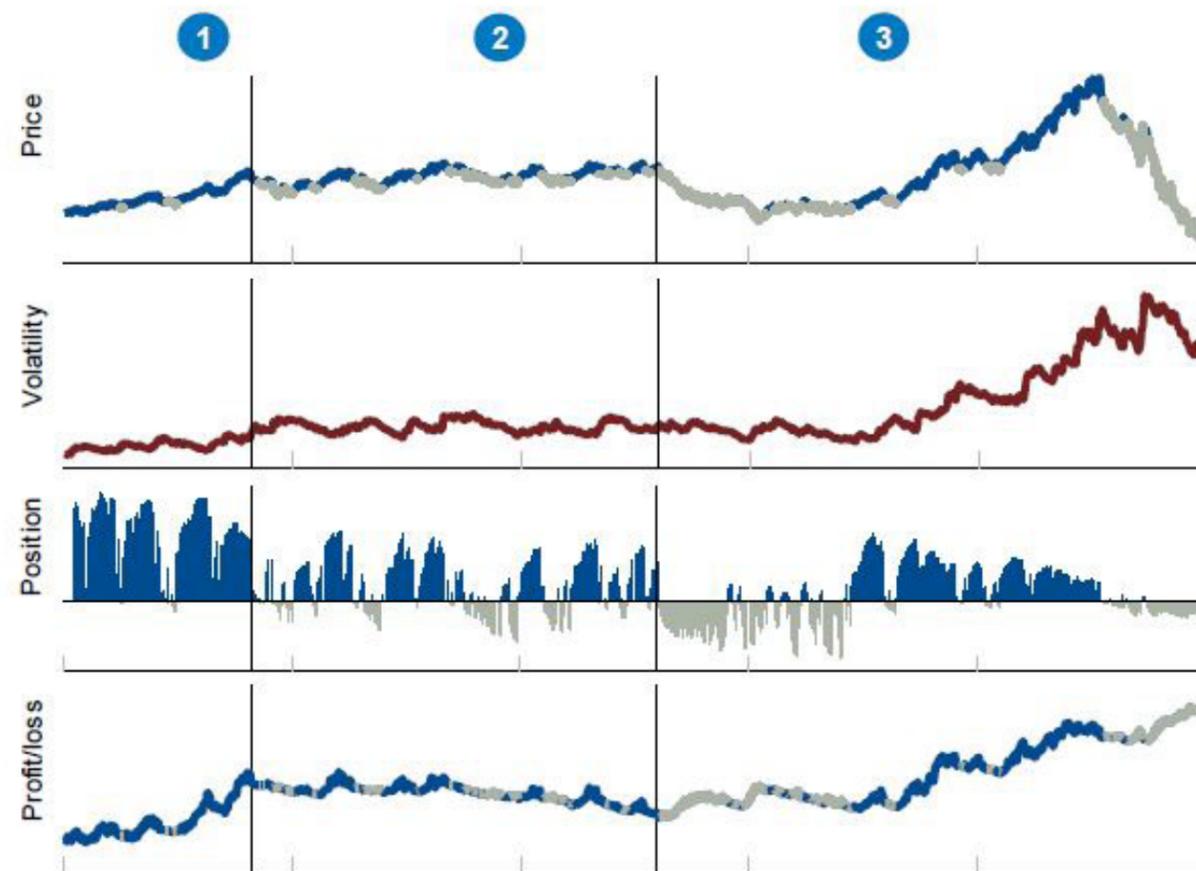

© Man 2016

Model Features

- 100% systematic, with no discretion
- Profits from sustained periods of rising or falling markets
- Suffers from markets reversals
- Diversification from using multiple speeds
- Momentum is a core building block for AHL

An Illustration

WTI Crude Oil Future

- 1 AHL aims to exploit the upward and downward trends over a range of timescales
- 2 Small losses during range-bound markets
- 3 Positions are adjusted to control risk – when volatility increases, positions are scaled back

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS

The above examples are intended as illustrations of a typical investment consideration and/or strategy implementation. It should not be constructed as indicative of the potential performance of the fund or strategy or any investment made by the fund. It is for training purposes only and does not constitute a recommendation or investment advice or solicitation to buy or sell any particular securities and should not be considered as any investment advice or research of any kind. Past performance is no guarantee of future results. There can be no guarantee that similar opportunities will be available in the future or that any opportunities identified will provide similar results.

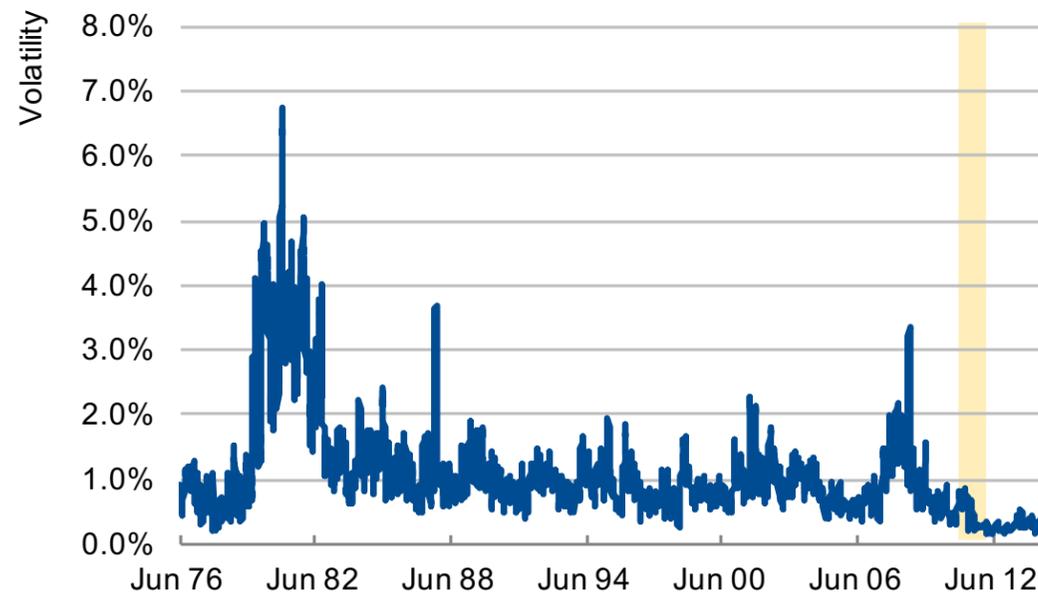

There is no guarantee of trading performance and past performance is no indication of current or future performance/results.

Source: Man database.

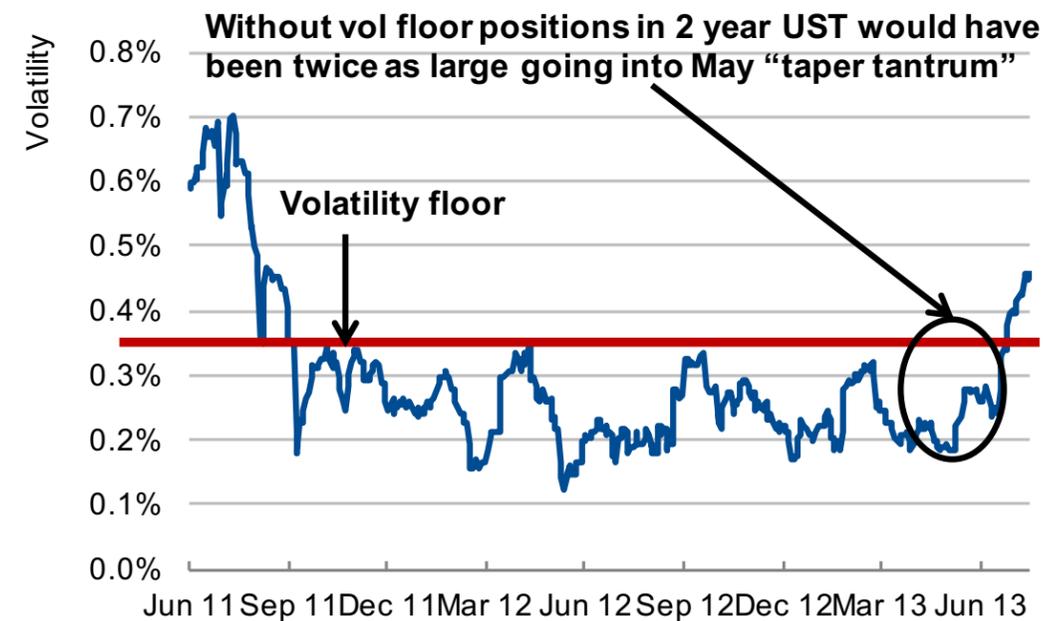

Model Features

Dealing with the unexpected - Illustrative example

- US 2 year treasury note – annualised yield volatility
- Model-driven strategies rely on robust analysis of historical market behaviour, without behavioural biases
- But some risks don't show up in back-tests, eg
 - with yields in much of the developed world at all time lows, yield volatility is also at unprecedented levels
 - as volatility tends to zero, standard vol scaling techniques would increase positions infinitely!

Better environment for trend following

Market diversification is back up to pre-crisis levels

- After a very strong 2008, average CTA returns were flat for five years
- Unprecedented central bank and government intervention
- Portfolio diversification severely diluted, high inter-market correlations

Managed Futures performance (Barclay BTOP50 index)

© Man 2016

Average pairwise correlation¹ for futures/FX markets

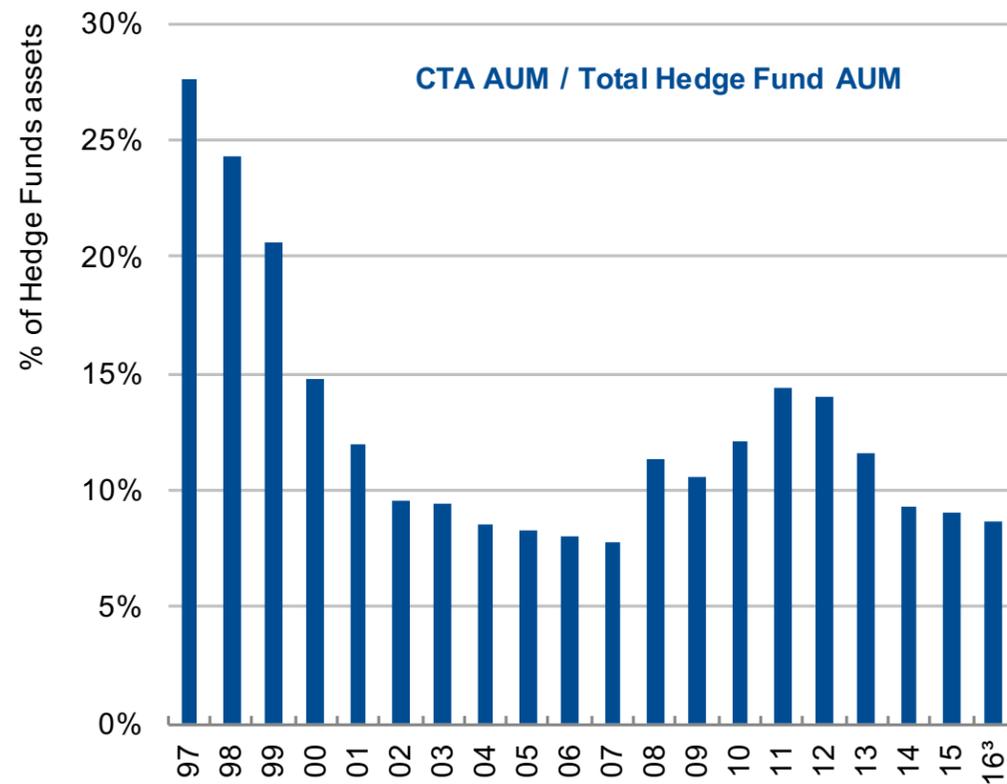

Market correlations approach pre-crisis levels

Past performance is not indicative of future results. 1. Correlation is measured as the average pairwise 1-year correlations of trend-following returns of AHL's futures and FX instruments using current models. Date range: 1 January 1997 to September 30th, 2016. Please note that the Barclay BTOP50 Index data over the past may be subject to change. Please note that the September 2016 figures for Barclay BTOP 50 are based on estimates. Source: Man Group database and Bloomberg.

Managed futures' participation in futures markets (2000-15)²

We believe, the argument that Man AHL is too large lacks credibility

1. CTA and hedge fund AUM have been derived from the BarclayHedge database, where Bridgewater AUM have been omitted from the CTA universe.

2. Based on the total number of listed futures contracts traded by CTAs.

3. As at September 30th, 2016.

Performance

AHL Diversified Programme¹: Track record

March 26th 1996 to September 30th 2016

© Man 2016

	AHL Diversified Programme¹	World stocks	Hedge fund index
Total return	983.0%	266.0%	337.7%
Annualised return	12.3%	6.5%	7.4%
Annualised volatility	16.5%	14.4%	6.9%
Worst drawdown	-19.5%	-50.4%	-21.4%
Sharpe ratio ²	0.58	0.26	0.68
Date of worst drawdown	Oct 01 to Apr 02	Oct 07 to Feb 09	Oct 07 to Feb 09
Correlation	1.00	-0.13	0.02

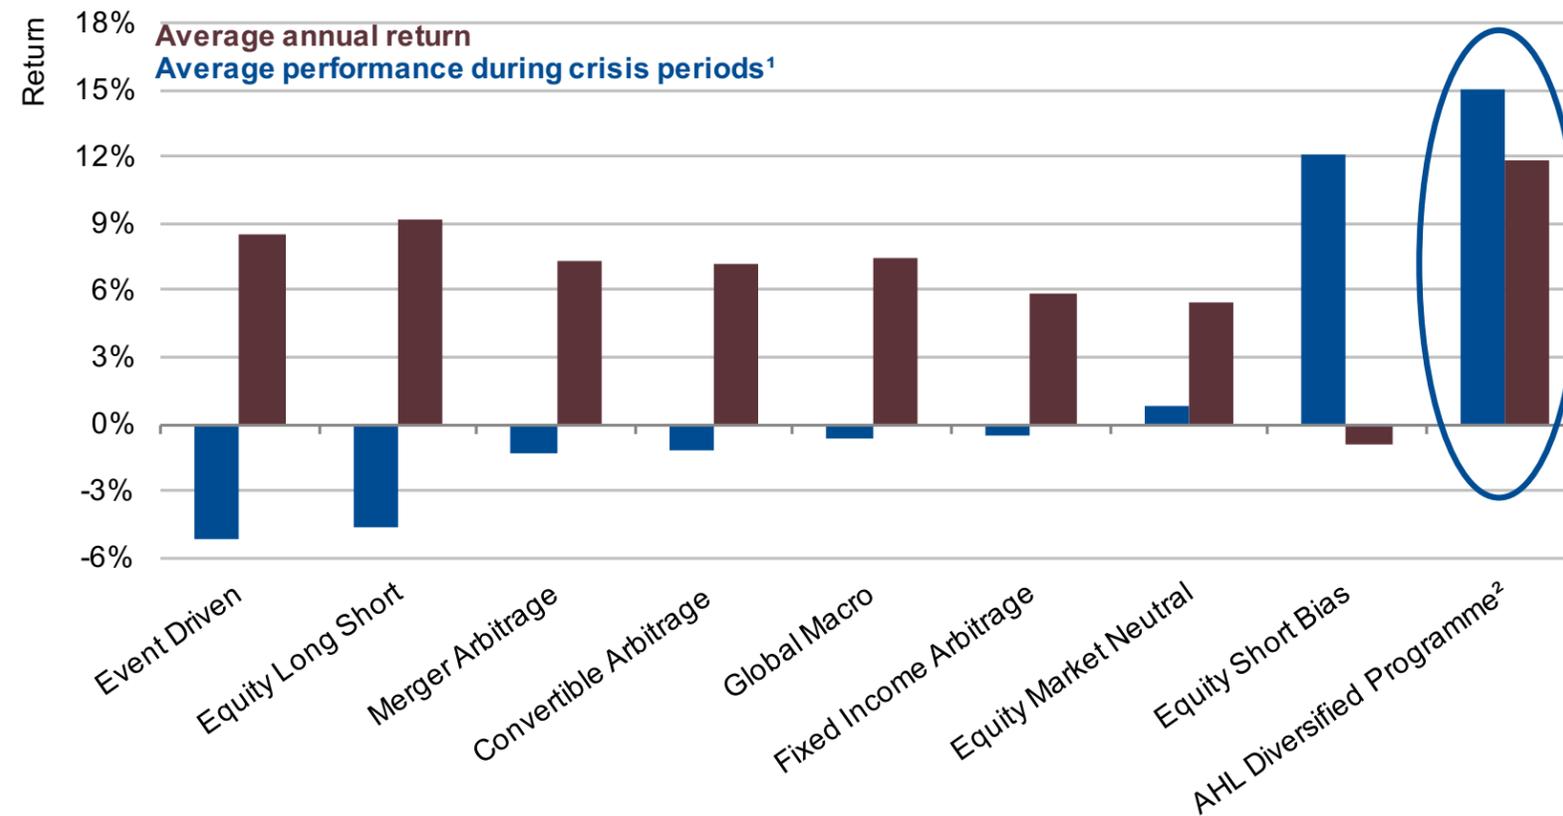

Past performance is not indicative of future results. Returns may increase or decrease as a result of currency fluctuations. 1. Please note that the performance data is not intended to represent actual past or simulated past performance of an investment product. The data is based on a representative investment product or products that fully invest in the programme. An example fee load of 3%+1% and 20% has been applied. 2. Sharpe ratio is calculated using the risk-free rate in the appropriate currency over the period analysed. Where an investment has underperformed the risk-free rate, the Sharpe ratio will be negative. Because the Sharpe ratio is an absolute measure of risk-adjusted return, negative Sharpe ratios are shown as n/a, as they can be misleading. World stocks: MSCI World Net Total Return Index hedged to USD. Hedge fund index: HFRI Fund Weighted Composite Index. Please note that the HFRI indices data over the past four months may be subject to change. The indices shown are selected by the Investment Manager for performance illustration and comparison purposes only. They are not formal benchmarks and do not form part of the programme's investment objective or investment policy.

AHL in a diversifying portfolio

Performance during equity market stress

January 1st, 1997 to 31 December 31st, 2015

- Most hedge fund strategies lose money during crises
- Managed futures is one of the few strategies with positive long term returns and long term positive 'crisis alpha'³

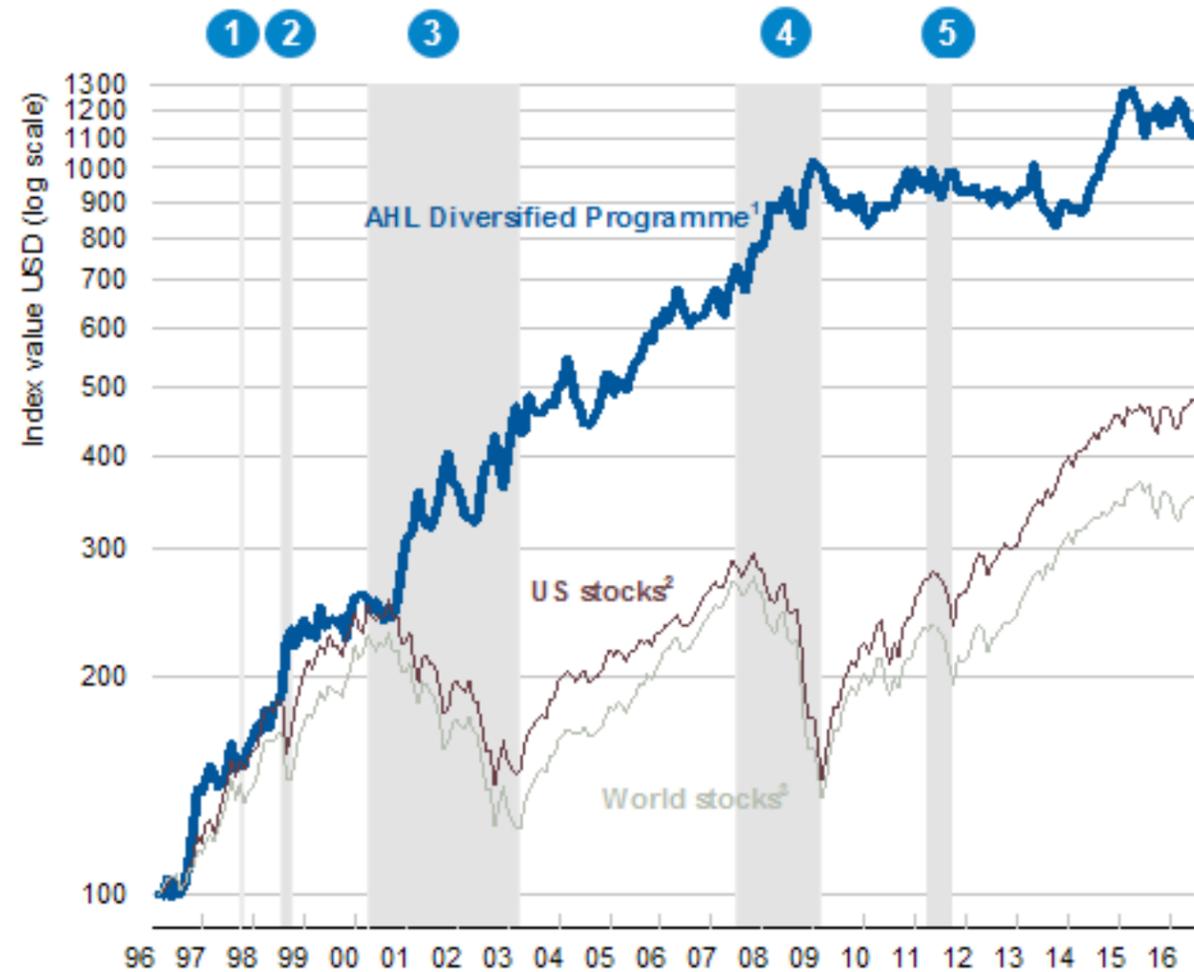

© Man 2016

Past performance is not indicative of future results. Returns may increase or decrease as a result of currency fluctuations. 1. Crisis periods are exceptional and the results do not reflect typical performance. To a certain extent, the start and end dates of such events are subjective and different sources may suggest different date ranges, leading to different performance figures. As a consequence, they give no indication of likely performance. Crisis are defined as S&P index down more than 10% during a two month period. 2. Please note that the performance data is not intended to represent actual past or simulated past performance of an investment product. The data is based on a representative investment product or products that fully invest in the programme. An example fee load of 3%+1% and 20% has been applied. 3. Crisis alpha is average performance during crisis periods.

AHL Diversified Programme aims to offer:

- access to a strategy with a proven track record
- the benefits of Man AHL's 29 year experience
- transparency on process and model features
- a trend following strategy that is able to benefit from the current strong prospects
- more markets and strong research as a source of differentiation versus competitors
- a highly diversifying addition to portfolios

Appendix

Research Process

How does a new model enter the portfolio?

© Man 2016

Tim Wong is Chairman of Man AHL ('AHL'), which was formed through the merger of Man Group's ('Man') two quantitative investing businesses in February 2013. He is also the Chairman of Man Group Asia and is a member of the Man Executive Committee. Prior to this he was the CEO of AHL for 10 years. He joined AHL in 1991 as a research analyst, and later assumed overall responsibility for the day-to-day running of the research and investment management operations. Tim graduated from the University of Oxford in 1991 with a first-class honours degree in Engineering Science. He subsequently gained an MSc in Statistics and Operational Research from London University. He is an Associate of the UK Society of Investment professionals.

Antoine Forterre is Chief Operating Officer of Man AHL ('AHL'), with overall responsibility for its day-to-day operations, business development, project management, trade monitoring and the implementation of changes to the trading system. Antoine will also further enhance the level of cooperation between AHL and Man Numeric as the two businesses work even more closely together over time. Antoine was previously Head of Corporate Development and Group Treasurer of Man Group, where he was responsible for sourcing and executing acquisitions as well as managing the Group's capital markets activities. Before joining Man Group in 2011, Antoine worked at Goldman Sachs in Securities, Asset Management and Investment Banking. Antoine graduated from ESSEC with a degree in finance and strategy.

Sandy Rattray is CIO of Man Group ('Man'), CEO of Man AHL ('AHL') and also a member of the Man Executive Committee. Sandy joined Man via Man GLG in 2007, after 15 years at Goldman Sachs where he was a Managing Director in charge of their Fundamental Strategy group. He also ran Equity Derivatives Research at Goldman Sachs in London and New York where he worked with many hedge fund and institutional investors on quantitative strategies and hedging. Sandy is a co-inventor of the VIX index. He has a double first class MA in Natural Sciences and Economics from Jesus College, Cambridge and a Licence Spéciale from the Université Libre de Bruxelles.

Anthony Ledford is Man AHL ('AHL')'s Chief Scientist and Academic Liaison. Anthony is based in the Man Research Laboratory (Oxford) and has overall responsibility for AHL's strategic research undertaken there. Prior to joining AHL in 2001, he lectured in Statistics at the University of Surrey. Anthony read Mathematics at Cambridge University, holds a PhD from Lancaster University in the development and application of multivariate extreme value methods and is a former winner of the Royal Statistical Society's Research Prize.

Matthew Sargaison is the Chief Investment Officer for Man AHL ('AHL'), with overall responsibility for investment management and research. He served as Chief Risk Officer between 2009 and 2012, prior to which he spent 13 years working at Deutsche Bank, Barclays Capital and UBS. Matthew originally worked for AHL from 1992 to 1995 as a trading system researcher and institutional product designer. Matthew gained his BA/MA in Mathematics from the University of Cambridge in 1991 and a Masters in Advanced Computer Science from the University of Sheffield.

Nick Granger is Portfolio Manager of AHL Dimension Programme, Man AHL's ('AHL') flagship systematic multi-strategy programme. He is also co-head of research, deputy CIO of AHL and a member of the Man Executive Committee. Nick joined AHL in 2008, initially to lead the development of AHL's systematic volatility trading strategies, later running cross asset-class research across the group. Before joining AHL, Nick was an equity derivatives strategist at JP Morgan, developing quantitative trading models. Nick graduated from the University of Oxford in 1996 with a first class degree in mathematics, and gained a PhD in Mathematical Logic in 1999 from the University of Manchester.

Darrel Yawitch is Chief Risk Officer for Man AHL ('AHL') with responsibility for risk management. Dr Yawitch joined AHL from GLG where he was a Risk Manager responsible for the Macro and Emerging Market strategies, as well as the majority of MSS funds. Prior to this Dr Yawitch worked at Investec Bank PLC for over 10 years where he headed the Market Risk and Asset and Liability Management teams for the bank before working in the Principal Finance area. Dr Yawitch holds a BSc (Hons) degree from the University of the Witwatersrand, Johannesburg, an MSc (Quantum Fields and Fundamental Forces) from Imperial College, London and a PhD in Theoretical Physics from Kings College, London. Dr Yawitch is a Fellow of the Faculty of Actuaries.

Russell Korgaonkar is Head of Portfolio Management at Man AHL ('AHL'). Russell joined the company in February 2001, and spent several years researching and building single-stock trading systems, including statistical arbitrage and fundamental factor models. He managed the equity market neutral fund from inception in 2005 until 2009, before concentrating on directional systems including a sector based equities model. He moved to his current role in March 2011, and is responsible for high-level portfolio construction, investment management, and research. In February 2016, he was given the additional role of Head of Institutional Solutions, with a mandate to build out AHL's offering of bespoke multi-product portfolios. Russell holds a BA/MA (First Class) in Physics from Oxford University.

Graham Robertson is the Head of Client Portfolio Management at Man AHL ('AHL') with principal responsibility for product development and client communication. Prior to joining AHL in 2011, Dr Robertson developed capital structure arbitrage strategies at KBC Alternative Investment Management and equity derivative relative value models for Vicis Capital. He started his career at Credit Suisse in fixed income markets before moving to Commerzbank where he established the relative value team and subsequently became Head of Credit Strategy. Graham holds a DPhil from Oxford University in Seismology and a BSc in Geophysics from Edinburgh University.

Gary Collier is co-CTO of Man AHL ('AHL'). Prior to taking on this role, Gary was Technology Manager, responsible for AHL's research and trading technology platforms with a particular focus on market data, trading strategies and signal generation. Gary joined AHL in 2001, having previously developed software systems across various finance, telecomms and defence arenas. He holds a Masters in Physics and Theoretical Physics from the University of Cambridge.

Richard Strutt is co-CTO of Man AHL ('AHL'). Previous to becoming co-CTO of AHL, Richard was Head of Execution Research and Technology, responsible for AHL's execution algorithm and platform development. Prior to joining AHL in 2010 Richard was Head of Calculation Services at Lloyds bank and prior to that the Head of Credit Derivatives Development at Dresdner Kleinwort. Richard holds a BSc and MSc in Theoretical Physics from the University of Bristol.

Rob Catterall is co-Head Man AHL ('AHL') Trading, based in London, Rob has been with AHL since 2006. Before becoming co-Head he was responsible for the European FX Financial and commodities teams. His responsibility now extends across all asset classes and regions ensuring AHL have the execution and clearing access to markets for the suite of quantitative products. Prior to joining AHL in Rob worked for Westpac Banking Corporation in London and Sydney for over 15 years. During his time at Westpac he traded a number of asset classes and was responsible for managing global interest rate swaps and swaption portfolios.

Richard Bagshaw is co-Head Man AHL ('AHL') Trading, based in Asia. Richard has been with AHL since 2002, he relocated to Hong Kong to set up the trading team in 2009. He built the HK platform out to cover trading, AHL system management and portfolio management. His responsibility now extends across all asset classes and regions ensuring AHL have the execution and clearing access to markets for the suite of quantitative products. Prior to the move to Hong Kong, Richard was leading the currency execution for AHL. Before joining AHL, Richard worked for 2 years as a foreign exchange trader in London. He graduated from the University of Warwick with a BEng in Manufacturing Engineering.
